

Downtown is the center of the community. It was once a regional shopping center and has gone through a series of challenges to return to its former condition. Today, with dozens of restored historic buildings and new residences, downtown is an attractive area where the ideal businesses include restaurants, entertainment, arts, small retail and personal services (e.g., hair salons, spas). If your business model involves a charming, emerging place where you can become part of a bigger arts and entertainment “scene,” this is the place to be!
